PROFESSIONAL SUMMARY

Full-Stack Engineer & Technical Project Manager with 3+ years of experience designing, deploying, and scaling web applications and production management systems. Holds a **BSc in Software Engineering (GPA: 3.94/4.00)**. Proven track record of leading cross-functional development teams, managing client communications, and architecting solutions across **e-commerce, restaurant management (online table booking, internal waiter ordering, bill splitting), and offline-first PWAs**. Expertise spans React, Node.js, PHP (Laravel/CodeIgniter), database optimization, and cloud deployment management.

EDUCATION & ACADEMIC EXCELLENCE

Microlink Information Technology College

Bachelor of Science in Software Engineering

Mekelle, Ethiopia

Graduated: Dec 2022

- **Academic Standing:** Cumulative GPA: **3.94 / 4.00** (Graduated with Highest Distinction).
- **Undergraduate Thesis:** Tour Guide Mobile App Architecture.
- **Core Coursework:** Software Architecture, Database Management Systems, Advanced Algorithms, Web Engineering, System Design.

TECHNICAL & MANAGEMENT SKILLS

Languages & Core Tech: JavaScript (ES6+), PHP, Python, Java, C++, HTML5/CSS3

Frontend Development: React, Progressive Web Apps (PWAs), Responsive Web Design, Bootstrap

Backend & APIs: Node.js, Laravel, CodeIgniter, RESTful API Architecture

Databases & Storage: MySQL, MongoDB, SQLite, Database Indexing & Query Optimization

DevOps, Hosting & Tools: Hostinger, VPS Management, Domain Configuration, Git, Postman, Docker, Jira

Project Management: Agile (Scrum), Sprint Planning, Team Leadership, Requirements Gathering, Client Relations

PROFESSIONAL EXPERIENCE

Ahaz Electronic and Software Solutions PLC

Full-Stack Developer & Technical Project Manager

Mekelle & Addis Ababa, Ethiopia

Apr 2025 – Present

- Direct end-to-end software delivery for 4+ production-grade web systems, managing cross-functional teams of developers and designers using Jira and Agile Scrum methodologies.
- Define technical requirements, system architecture, project scope, and release timelines directly with clients and key stakeholders.
- Oversee cloud environments (Hostinger/VPS), SSL certificates, domain routing, and CI/CD deployment pipelines.
- Mentor 8+ university interns and junior engineers, conducting code reviews, technical workshops, and full-stack architecture training.

Full-Stack Developer

Jan 2023 – Jan 2025

- Architected and deployed 8+ scalable web applications across e-commerce, management, and non-profit domains.
- Designed relational and non-relational database schemas (MySQL, SQLite, MongoDB), optimizing complex queries and indexing to improve response times by 40%.
- Built RESTful APIs and integrated third-party services, including Stripe API payment workflows for subscription and one-time transaction management.

FEATURED PROJECTS

Habesha Restaurant Management & Booking System | habesha-restaurant.be

Lead Developer & Architect

- Built an end-to-end, 7-language restaurant management ecosystem serving **4,350+ active users/bookings**.
- Engineered an Online Table Booking System and Online Ordering System integrated with a real-time Internal Waiter Ordering Module for table service.
- Implemented role-based access control (Admins, Waiters, Kitchen Staff), automated bill splitting, and separate kitchen/bar order routing.

Haile Aggregate Production Management System

Lead Full-Stack Developer

- Architected a Progressive Web Application (PWA) with **offline-first local data persistence** and auto-synchronization mechanisms for low-connectivity environments.
- Developed modules for real-time sales tracking, production monitoring, admin access control, and automated report exports (PDF/Excel).

Misgana Charity & E-Commerce Donation Platform | misgana.be

Full-Stack Developer

- Designed a web donation platform serving active donors and managed by 16+ staff members.
- Integrated **Stripe API** for secure credit card and subscription payment processing, alongside automated email notification workflows.

Smart Tourism Tigray Platform

Research & Development Lead

- Architecting an AI-powered recommendation platform to connect tourists with local service providers and personalize travel itineraries based on user preferences.
